REPORT.

REPORT ON THE BIRTHS, DEATHS AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 31ST MARCH 1920.

THE more outstanding features of the vital statistics of Scotland in the First Quarter of the year 1920 are a high birth-rate, one in marked contrast to those of wartime, a high marriage-rate, and a low death-rate. The number of births registered during the quarter was 37,748, and is the largest number registered in Scotland in any quarter since the institution of national registration. It is 66·1 per cent. more than that of the first quarter of the previous year, 1919. The birth-rate was correspondingly high. It was 30·9 per thousand, which is higher than those of all first quarters since 1891, and higher than those of all quarters subsequent to the second quarter of the year 1905. Marriages registered during the quarter numbered 11,751, and the marriage-rate was 9·6. Both the number and the rate exceed those of all first quarters since the institution of national registration. The deaths of the quarter numbered 18,925, and the death-rate was 15·5 per thousand. In only one previous first quarter, 1918, was a lower death-rate recorded.

BIRTHS.

Births registered in Scotland during the First Quarter of the year 1920 numbered 37,748. This number is 3272 more than that of the previous quarter, 15,238 more than that of the first quarter of last year, 11,857 more than the mean of those of the first quarters of the preceding five years, and 9614 more than the mean of those of the first quarters of the preceding ten years. It is the largest number of births registered in any quarter since the institution of national registration. The previous largest number was 36,377, which occurred in the second quarter of 1903, and compared with it that of this quarter is 1371, or 3·8 per cent., more.

The quarterly Scottish birth-rate was 30·9. It is 3·0 more than that of the previous quarter, 12·3 more than that of the corresponding quarter of last year, 9·3 more than the mean of those of the first quarters of the preceding five years, and 7·1 more than the mean of those of the first quarters of the ten preceding years. It is higher than the birth-rates of all first quarters since 1891, and higher than those of all quarters since the second quarter of 1905.

Of the 37,748 children whose births were registered, 19,261 were male and 18,487 were female, the ratio of male to female being 104·2 to 100. In the previous quarter this ratio was 105·4 to 100.

In the Divisions of the Counties the quarterly birth-rate varied from 33·2 in the South-Western, and 32·5 in the North-Eastern, to 23·4 in the Northern, and 25·9 in the North-Western. In the East-Midland Division it was 29·3; in the Southern, 28·7; in the South-Eastern, 28·4; and in the West-Midland, 28·1.

TABLE I.—BIRTHS, ILLEGITIMATE BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, and in the Divisions of the Counties during the Quarter ending 31st March 1920, with relative rates; also Infantile Mortality.

| | POPULATION. | | TOTAL BIRTHS. (Corrected.) | | ILLEGITIMATE BIRTHS. (Corrected.) | | DEATHS. (Corrected for Transfer.) | | MARRIAGES. | | DEATHS OF CHILDREN UNDER ONE YEAR. (Corrected.) | |

| Southern Do. | 190382 | 176900 | 1264 | 28·7 | 159 | 12·6 | 823 | 18·7 | 389 | 8·8 | 109 | 86 |

In the counties the birth-rate varied from 34·1 in Banff, 33·7 in Linlithgow, 33·5 in Lanark, 32·9 in Renfrew, and 32·6 in Aberdeen, to 17·4 in Bute, 20·3 in Shetland, 22·0 in Selkirk, and 22·2 in Sutherland.

In the larger burghs taken collectively, this rate was 32·0; in the smaller burghs, 30·8; and in the county districts, 29·1. In the larger burghs this rate was 3·0, in the smaller burghs 3·1, and in the county districts 2·8, higher than in the previous quarter.

In the larger burghs taken individually the birth-rate varied from 39·3 in Greenock, 36·7 in Hamilton, 36·2 in Motherwell, and 35·9 in Coatbridge, to 26·0 in Edinburgh, 27·0 in Perth, 27·6 in Ayr, and 28·5 in Kilmarnock. In Glasgow this rate was 32·8; in Dundee, 31·5; and in Aberdeen, 33·8.

In burghs with censal populations of over 10,000 but less than 30,000 the birth-rate varied from 47·8 in Irvine, 44·3 in Fraserburgh, 44·3 in Port-Glasgow, 39·8 in Dunfermline, and 37·1 in Peterhead, to 24·3 in Cowdenbeath, 24·3 in Forfar, 25·0 in Galashiels, 25·9 in Hawick, and 26·4 in Rutherglen.

In the county districts with populations of more than 10,000, this rate ranged from 40·0 in Annan District of Dumfries, 39·1 in Thornhill District of Dumfries, 37·7 in Middle Ward District of Lanark, 37·1 in Easter Ross District of Ross and Cromarty, and 36·6 in Deer District of Aberdeen, to 18·0 in Mid-Ross District of Ross and Cromarty, 18·9 in Cupar District of Fife, 19·2 in Central District of Perth, 20·1 in Skye District of Inverness and in Mainland District of Shetland, 20·7 in Western District of Perth, and 20·9 in St. Andrews District of Fife.

Of the 37,748 children whose births were registered, 35,058, or 92·9 per cent., were legitimate, while 2690, or 7·1 per cent., were illegitimate.

The legitimate children of the quarter are 2999 more than those of the previous quarter, and 14,616 more than those of the first quarter of last year. The illegitimate children of the quarter are 273 more than those of the previous quarter, and 621 more than those of the corresponding quarter of last year. The legitimate children of the quarter are 71·5 per cent. more than those registered in the first quarter of last year, while the illegitimate children are 30·0 per cent. more. The illegitimate rate of the quarter is 0·1 higher than that of the previous quarter, but is 2·1 less than that of the first quarter of last year.

In the Divisions of the Counties the quarterly illegitimate rate varied from 12·6 per cent. in the Southern, and 12·1 in the North-Eastern, to 5·9 in the South-Western, 6·0 in the West-Midland, and 6·7 in the North-Western. In the Northern this rate was 7·8, in the East-Midland 7·3, and in the South-Eastern 7·0.

In the counties this rate ranged from 16·2 per cent. in Kirkcudbright, 15·7 in Elgin, 13·5 in Wigtown, 12·5 in Bute, and 12·2 in Banff, to 3·8 in Shetland, 4·2 in Dumbarton, and 5·0 in Ross and Cromarty.

In the larger burghs taken collectively this rate was 6·5, in the smaller burghs 6·5, and in the county districts 8·6. In the larger burghs this rate was 3·0 less than in the first quarter of last year, in the smaller burghs it was 2·2 less, and in the county districts, 0·4 less.

In the larger burghs taken individually the illegitimate rate varied from 9·7 in Falkirk, 8·4 in Aberdeen, 8·1 in Perth and 8·0 in Dundee, to 3·3 in Clydebank, 3·9 in Hamilton, 5·2 in Paisley, and 5·3 in Motherwell. In Glasgow this rate was 6·2, and in Edinburgh 7·5.

In burghs with censal populations of more than 10,000 but less than 30,000 the illegitimate rate varied from 14·3 per cent. in Peterhead, 13·3 in Galashiels, 10·4 in Inverness, and 10·1 in Montrose, to 0·5 in Rutherglen, 2·7 in Renfrew, and 2·9 in Port-Glasgow.

In county districts with populations of upwards of 10,000 it varied from 28·8 per cent. in Garioch District of Aberdeen, 23·6 in Turriff District of Aberdeen, 20·0 in Highland District of Perth, and 19·2 in Keith District of Banff, to 1·4 in Lews District of Ross and Cromarty, 1·8 in Skye District of Inverness, 1·9 in Central District of Stirling, 2·4 in Mainland District of Shetland, and 3·5 in Lower District of Renfrew.

Births registered in January numbered 12,678; in February, 11,822; and in March, 13,248. The monthly birth-rate in January was 30·4, in February 30·3, and in March 31·8. Compared with the numbers registered in the corresponding months of last year, that of January is 4602 more; of February, 5111 more; and of March, 5524 more. Compared with the rates of the corresponding months of last year the January birth-rate is 11·0 higher, the February birth-rate 12·5 higher, and the March birth-rate 13·3 higher.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 11,751. This number is 340 more than that of the previous quarter, 2948 more than that of the first quarter of last year, 3569 more than the mean of those of the first quarters of the five preceding years, and 3906 more than the mean of those of the first quarters of the preceding ten years. It is the largest number of marriages registered in any first quarter since the institution of national registration, and that is since 1855. The previous largest first quarterly number was that of last year, 1919; it was 8808,

TABLE II.—Number of Births, Deaths, and Marriages in Scotland, and their Proportion to the Population, estimated to the middle of each year, during each Quarter of the Years 1910 to 1920 inclusive.

| YEAR. | | | | | | | | | | | | | | | | | | | | | | | |
| Population | 4,737,268 | | 4,749,673 | | 4,741,077 | | 4,728,132 | | 4,747,167 | | 4,785,598 | | 4,824,308 | | 4,854,733 | | 4,886,274 | | 4,894,100 | | | | |
| Births, | 124000 | 26.2 | 121811 | 25.6 | 122716 | 25.9 | 120516 | 25.5 | 123934 | 26.1 | 114181 | 23.9 | 109942 | 22.8 | 97482 | 20.1 | 98554 | 20.2 | 106263 | 21.7 | 23.8 | | |
| Deaths, | 72245 | 15.3 | 71732 | 15.1 | 72337 | 15.3 | 73069 | 15.5 | 73557 | 15.5 | 81631 | 17.1 | 70640 | 14.6 | 69481 | 14.3 | 78372 | 16.0 | 75141 | 15.4 | 15.4 | | |
| Marriages, | 30866 | 6.5 | 31811 | 6.7 | 32510 | 6.9 | 33691 | 7.1 | 35049 | 7.4 | 36272 | 7.6 | 31483 | 6.5 | 30486 | 6.3 | 34600 | 7.1 | 44126 | 9.0 | 7.8 | | |

and thus the number of marriages registered in this quarter exceeds the largest number previously registered in a first quarter by 33·4 per cent.

The quarterly marriage-rate was 9·6 per thousand. It is 0·4 more than that of the previous quarter, 2·3 more than that of the first quarter of last year, 2·8 more than the mean of those of the first quarters of the preceding five years, and 3·0 more than the mean of those of the first quarters of the preceding ten years. It is the highest marriage-rate of all first quarters since the institution of national registration.

In the Divisions of the Counties the quarterly marriage-rate varied from 10·8 in the South-Western, 9·4 in the East-Midland, and 9·3 in the South-Eastern, to 7·5 in the North-Western and in the West-Midland, and 7·9 in the Northern and in the North-Eastern.

In the counties, burghs included, the marriage-rate ranged from 11·4 in Lanark, 10·9 in Shetland, 10·8 in Forfar, 10·4 in Dumfries, and 10·3 in Midlothian, to 4·1 in Bute, 4·7 in Kincardine, and 4·7 in Argyll.

In the larger burghs taken collectively this rate was 11·5; in the smaller burghs, 9·5; and in the county districts, 6·7. Compared with the rate of the previous quarter, that of the larger burghs is 0·3 more, and that of the county districts is 0·8 more, but that of the smaller burghs is of the same amount. Compared with the rate of the corresponding quarter of last year, that of the larger burghs is 2·5 more; of the smaller burghs, 2·3 more; and of the county districts, 2·1 more.

In the larger burghs taken individually the quarterly marriage-rate varied from 14·6 in Falkirk, 12·5 in Glasgow, and 12·0 in Aberdeen, to 5·1 in Clydebank, 8·0 in Leith, 8·2 in Motherwell, and 8·3 in Coatbridge. In Edinburgh this rate was 11·8, and in Dundee 11·5. In burghs with populations of between 10,000 and 30,000 this rate varied from 16·3 in Dunfermline, 15·1 in Inverness, 14·8 in Dumfries, 14·4 in Forfar, and 14·1 in Arbroath, to 5·3 in Grangemouth, 5·4 in Fraserburgh, 5·6 in Peterhead, and 6·1 in Galashiels. In the county districts with populations of more than 10,000 it varied from 14·0 in Lews District of Ross and Cromarty, 10·5 in Ayr District of Ayr, and 9·2 in County District of Clackmannan, to 2·3 in Keith District of Banff, 2·5 in Western District of Perth, 2·5 in Western District of Stirling, 3·1 in Banff District of Banff, and 3·3 in Ellon District of Aberdeen.

Marriages registered in Scotland in January numbered 5505; in February, 2775; and in March, 3471. The monthly marriage-rate in January was 13·2; in February, 7·1; and in March, 8·3. Compared with the rate of the corresponding months in last year, that of January is 4·3, or 48 per cent., more; that of February, 1·2, or 20 per cent., more; and that of March, 1·4, or 20 per cent., more.

DEATHS.

Deaths registered during the quarter numbered 18,925. This number is 2671 more than that of the previous quarter, but is 10,031 less than that registered during the first quarter of last year. This number is 3700 less than the mean of those of the first quarters of the preceding five years, and 2687 less than the mean of those of the first quarter of the preceding ten years. During the last sixty years there have been only four years in the first quarter of which fewer deaths have been registered, these four years, and the number of deaths registered in the first quarter of each being, 1918, 17,885; 1896, 18,510; 1882, 18,265; and 1868, 18,042.

The death-rate of the quarter was 15·5 per thousand. It is 2·4 more than that of the previous quarter, but is 8·4 less than that of the first quarter of last year, 3·4 less than the mean of those of the first quarters of the preceding five years, and 2·8 less than the mean of those of the first quarters of the preceding ten years. The only first quarter in which a lower death-rate occurred was that of 1918, when the rate was 14·9.

In the Divisions of the Counties the death-rate of the quarter varied from 18·7 in the Southern, and 17·8 in the Northern, to 14·1 in the South-Eastern, and 14·2 in the West-Midland. In the North-Eastern, it was 17·1; in the North-Western, 16·6; in the East-Midland, 15·4; and in the South-Western, 15·4.

In the counties, burghs included, this rate varied from 21·8 in Kinross and in Wigtown, 20·9 in Kirkeudbright, 19·6 in Orkney, and 19·1 in Argyll and in Bute, to 11·2 in Linlithgow, 11·4 in Nairn, 12·3 in Dumbarton, and 12·8 in Selkirk.

In the larger burghs taken collectively the death-rate was 15·9; in the smaller burghs, 16·0; and in the county districts, 14·4. In the previous quarter these rates were 13·5, 12·9 and 12·3 respectively, and in the first quarter of the previous year, 25·4, 22·0 and 21·9.

In the larger burghs taken individually this rate varied from 20·8 in Greenock, 18·3 in Aberdeen, 16·9 in Dundee, 16·7 in Leith, and 16·4 in Glasgow, to 11·0 in Clydebank, 12·8 in Kilmarnock, 13·1 in Perth, and 13·3 in Paisley. In Coatbridge this rate was 15·3; in Ayr, 15·3; in Hamilton, 15·0; in Falkirk, 14·9; in Motherwell, 14·4; in Edinburgh, 14·2; and in Kirkecaldy, 13·8.

In burghs with populations of between 10,000 and 30,000 the death-rate varied from 24·3 in Dumfries, 23·5 in Montrose, 21·5 in Arbroath, and 19·2 in Peterhead, to 9·0 in Barrhead, 9·3 in Renfrew, and 9·5 in Cowdenbeath.

In county districts with populations of over 30,000 the quarterly death-rate varied from 25·8 in Rhins District of Wigtown, 20·6 in Lorn District of Argyll, 19·4 in Mainland District of Shetland, and 19·2 in Mid-Ross District of Ross and Cromarty, to 9·0 in Upper District of Renfrew, 9·1 in Linlithgow District of Linlithgow, and 10·6 in Eastern District of Dumbarton, in Lower Ward District of Lanark, and in Central District of Stirling.

Deaths registered in January numbered 6526; in February 5519; and in March 6880. In January the monthly death-rate was 15·7, in February 14·2, and in March 16·5. In the previous year these three rates were 17·8, 29·7, and 24·8, respectively, the high rates of February and March being associated with an epidemic of influenza.

AGES OF THOSE DYING.

Of the 18,925 persons whose deaths were registered during the quarter, 4761, or 25·1 per cent., were less than five years old, 7960, or 42·1 per cent., were more than five but less than sixty-five, and 6203, or 32·8 per cent., were sixty-five or over. In one instance the age at death was not recorded. Compared with the number in the previous quarter, that of deaths of children of less than five years old is 1211 more; of persons of five to sixty-five years old, 875 more; and of persons of sixty-five and over, 585 more. Compared with the number in the first

quarter of last year, that of children of less than five is 2286 less; of persons of five to sixty-five, 5463 less; and of persons of sixty-five and over, 2274 less.

Deaths of children of less than one year old numbered 3466. This number is 917 more than that of the previous quarter, but is 536 less than that of the corresponding quarter of last year. The registered births of the quarter numbered 37,748, and these deaths of children of less than one year old equal an infantile mortality rate of 92 per thousand registered births. This rate is 18 more than that of the previous quarter, but is 86 less than that of the first quarter of last year.

In the Divisions of the Counties the infantile mortality rate of the quarter varied from 114 in the North-Eastern, and 96 in the South-Western, to 49 in the Northern, and 63 in the North-Western. In the East-Midland it was 89; in the Southern, 86; in the South-Eastern, 84; and in the West-Midland, 77.

In the counties, burghs included, this rate ranged from 125 in Kincardine, 121 in Aberdeen, 110 in Forfar, and 103 in Wigtown, to 20 in Kinross, 30 in Selkirk, 30 in Shetland, and 38 in Orkney.

In the larger burghs taken collectively the quarterly infantile mortality rate was 103; in the smaller burghs, 82; and in the county districts, 79. In the previous quarter, these three rates were 80, 69, and 66 respectively, and in the first quarter of last year 196, 170, and 156 respectively.

In the larger burghs taken individually this rate varied from 140 in Aberdeen, 128 in Dundee, 124 in Motherwell, and 123 in Greenock, to 61 in Ayr, 69 in Kirkcaldy, 75 in Falkirk, and 80 in Hamilton. In Glasgow this rate was 100, and in Edinburgh, 94.

In those of the smaller burghs which have estimated populations of more than 10,000, this rate varied from 241 in Peterhead, 144 in Musselburgh, 120 in Kirkintilloch, 113 in Fraserburgh, 101 in Buckhaven Methil and Innerleven, and 100 in Irvine, to 25 in Grangemouth, 38 in Montrose, 43 in Dumbarton, 44 in Barrhead, and 44 in Galashiels.

In the county districts with populations of more than 10,000 this rate varied from 159 in Central District of Perth, 138 in Kilmarnock District of Ayr, 129 in Rhins District of Wigtown, 122 in Banff District of Banff, and 116 in County District of Clackmannan, to 0 in Mainland District of Shetland, 20 in Lorn District of Argyll, 29 in Highland District of Perth, 31 in Perth District of Perth, and 32 in Aberdeen District of Aberdeen and in Lews District of Ross and Cromarty.

CAUSES OF DEATH.

Of the 18,925 deaths registered, 1057 were attributed to the principal epidemic diseases, and included 24 from enteric fever, 337 from measles, 66 from scarlet fever, 177 from whooping-cough, 238 from diphtheria (deaths attributed to croup included), and 215 from the diarrhoeas of childhood. Collectively these deaths are 126 more than in the previous quarter, but 393 less than in the first quarter of last year. Compared with the number in the previous quarter, deaths from the diarrhoeas of childhood are 49 fewer, those from scarlet fever are 34 fewer, and those from enteric fever are 3 fewer, but those from diphtheria are 17 more, from whooping-cough 68 more, and from measles 127 more.

The death-rate from the principal epidemic diseases was 0·9 per thousand. It is 0·1 more than that of the previous quarter, but 0·3 less than that of

the first quarter of last year. The quarterly death-rate from enteric fever was 2 per 100,000; from measles, 28; from scarlet fever, 5; from whooping-cough, 14; from diphtheria, 19; and from the diarrhoeas of childhood, 18.

In the counties, burghs included, the principal epidemic diseases death-rate varied from 3·9 per thousand in Wigtown, and 1·4 in Aberdeen, in Elgin and in Kincardine, to 0 in Kinross, in Nairn, in Shetland and in Sutherland. In the larger burghs this rate varied from 2·3 in Coatbridge, 1·9 in Greenock and in Falkirk, and 1·8 in Aberdeen, to 0·2 in Perth and in Kilmarnock, 0·3 in Clydebank, and 0·4 in Leith. In Glasgow this rate was 0·8; in Edinburgh 0·7; and in Dundee, 1·2. In burghs with populations of between 10,000 and 30,000 this rate varied from 3·5 in Kirkintilloch, 3·3 in Johnstone, 2·2 in Peterhead, and 2·0 in Arbroath, to 0 in Barrhead, in Forfar, in Grangemouth, in Montrose and in Port-Glasgow. In county districts with populations of over 10,000 it varied from 6·6 in Rhins District of Wigtown, 2·1 in Annan District of Dumfries, 1·7 in Eastern District of Stirling, and 1·6 in Deer District of Aberdeen and in Garioch District of the same county, to 0 in nine of these districts.

No deaths from typhus fever were registered during the quarter, but there were 3 from small-pox, 11 from malaria, 63 from erysipelas, and 31 from cerebro-spinal meningitis. The 3 deaths from small-pox were all registered in Glasgow, 2 of them being of unvaccinated children, and 1 of a person aged over 65 whose vaccination was reported as doubtful.

Deaths from all forms of tuberculous disease numbered 1607, and constituted 8·5 per cent. of the total deaths of the quarter. These deaths are 357 more than those of the previous quarter, but 355 fewer than those of the first quarter of last year. They equal an annual death-rate of 131 per 100,000, which rate is 30 more than that of the previous quarter, but 31 less than that of the first quarter of last year. These deaths include 1136 from phthisis, 152 from tuberculous meningitis, 124 from abdominal tuberculosis, and 195 from other forms of tuberculous disease. The quarterly death-rate from phthisis was 93 per 100,000; from tuberculous meningitis, 12; and from abdominal tuberculosis, 10. The phthisis death-rate is 21 more than that of the previous quarter, but 21 less than that of the first quarter of last year.

Deaths from malignant disease numbered 1414, being 13 fewer than in the previous quarter, and 16 fewer than in the first quarter of last year. They equal an annual death-rate of 116 per 100,000. Deaths from apoplexy numbered 1253, and from heart disease 1768, the former being 105, and the latter 95, more than in the previous quarter.

Deaths from pneumonia numbered 1918, constituted 10·1 per cent. of the total, and equalled an annual death-rate of 157 per 100,000. These deaths are 728 more than in the previous quarter, but 5694 less than in the first quarter of last year. Deaths from bronchitis numbered 1587, constituted 8·4 per cent. of the total, and equalled an annual death-rate of 130 per 100,000. These deaths are 485 more than those of the previous quarter, but 1647 less than in the first quarter of last year.

Deaths of which influenza was the sole named cause numbered 82, and those of which influenza was one of two or more named causes, 269. In the previous quarter these numbers were 38 and 97, while in the first quarter of last year they were 970 and 5312.

Deaths from diseases and accidents of pregnancy and childbirth numbered 258. They are 39 more than in the previous quarter, and 66

more than in the first quarter of last year. They equal a death-rate of 6·8 per 1000 registered births, which rate is 0·4 more than that of the previous quarter, but is 1·7 less than that of the first quarter of last year.

Deaths attributed to violent causes numbered 784. They number 56 less than in the previous quarter, but 41 more than in the first quarter of last year.

Deaths of which the causes were ill-defined numbered 324, while those the cause of which was unspecified or merely described as "Natural Causes" numbered 104. The former included 248 attributed to heart failure, 48 to syncope, 8 to "sudden death," 1 to dropsy, and 19 others.

TABLE III.—DEATHS FROM INFLUENZA DURING QUARTER ENDING
31ST MARCH 1920.

| | Total. | Males. | Females. | Age Distribution. | | | | | |
|--|--------|--------|----------|-------------------|----|-----|-----|-----|--------------|

REPORT.

REPORT ON THE BIRTHS, DEATHS AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH JUNE 1920.

THE more outstanding features of the vital statistics of Scotland in the Second Quarter of the year 1920 are a birth-rate which, though somewhat less than that of the previous quarter, is more than average; a death-rate which, though somewhat higher than that of the second quarter of the previous year, is less than average; and a high marriage-rate. The quarterly birth-rate is 29·6; it is 1·3 less than that of the first quarter, but 10·1 more than that of the second quarter of 1919. The death-rate of the quarter is 14·9 per thousand; it is 1·3 more than that of the second quarter of 1919, but is 0·3 less than the mean of those of the second quarters of the preceding ten years. The marriage-rate is 9·7 per thousand; it is 0·2 more than that of the second quarter of 1919, and 2·5 more than the mean of those of the preceding ten years. An examination of the death returns of the quarter brings out evidence of two epidemics, the one of influenza and the other of small-pox. The influenza epidemic commenced in the month of March, attained a maximum in April, and by June had subsided; in this quarter—April to June—752 deaths were ascribed to this cause. Deaths from small-pox during the quarter numbered 50, 45 of them occurring in Glasgow. In the year 1904 there was an epidemic of small-pox, accounting for 185 deaths, but since then until the present outbreak the country has been very free from this disease, the total deaths in the fifteen intervening years only amounting to 38. The number of illegitimate children whose births were registered during the quarter—2756—is exceptionally large; it is larger than in any quarter since that ending 30th June 1880.

BIRTHS.

Births registered in Scotland during the Second Quarter of the year 1920 numbered 36,215. This number is 1533 less than that of the previous quarter, but is 12,356 more than that of the second quarter of the previous year, 8848 more than the mean of those of the second quarters of the preceding five years, and 6114 less than that of the second quarters of the preceding ten years. There are only two previous quarters in which a larger number of births were registered in Scotland, the one being the previous quarter, the first quarter of this year, and the other being the second quarter of the year 1903.

The Scottish birth-rate of the quarter was 29·6 per thousand. This rate is 1·3 less than that of the previous quarter, but is 10·1 more than that of the second quarter of last year, 6·9 more than the mean of the rates of the second quarters of the preceding five years, and 4·4 more than that of the second quarters of the preceding ten years. It is higher than the second quarter birth-rates of all years since 1909.

It is not without interest to trace the rise of the national birth-rate consequent on the demobilization of the troops. This commenced early in 1919. The birth-rates of the months of January to August of that year

TABLE I.—BIRTHS, ILLEGITIMATE BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, and in the Divisions of the Counties during the Quarter ending 30th June 1920, with relative rates; also Infantile Mortality.

| Southern Do. | 190382 | 176900 | 1307 | 29·7 | 158 | 12·1 | 677 | 15·4 | 449 | 10·2 | 100 | 77 |

were all low, varying from 17·8 per thousand in February to 20·3 in June. In September this rate rose to 22·1, and in October to 27·0; in November it fell slightly, being 26·6, but in December rose to 30·0. In January of this year it was 30·4, and in February 30·3. In March it attained a maximum of 31·8, and in April was nearly as high, 31·5, but in May a decline was manifest, the birth-rate being 29·3, and a further fall to 28·1 occurred in June. From these figures it may be deduced that while the birth-rate of the quarter, and that of the last month of the quarter, remain high, it is again a declining quantity, and that the maximum consequent on demobilization has been reached and been passed.

Of the 36,215 living children whose births were registered during the quarter, 18,546 were male and 17,669 were female, the ratio of male to female children being 105·0 to 100. In the previous quarter this ratio was 104·2 to 100, and in the corresponding quarter of last year 107·7 to 100.

In the Divisions of the Counties the quarterly birth-rate varied from 31·9 in the South-Western, 31·0 in the North-Eastern, and 29·7 in the Southern, to 22·2 in the Northern, 23·8 in the North-Western, and 26·7 in the South-Eastern. In the West-Midland it was 28·1 and in the East-Midland 27·8.

In the counties the birth-rate varied from 33·9 in Clackmannan, 33·1 in Banff, 32·5 in Linlithgow, and 32·2 in Kincardine and in Ayr, to 18·4 in Orkney, 18·8 in Sutherland, 19·7 in Selkirk, 21·0 in Bute and in Shetland, 21·3 in Peebles, 21·5 in Inverness, and 21·6 in Argyll.

In the larger burghs taken collectively this rate was 29·9; in the smaller burghs, 29·8; and in the county districts, 29·1. Compared with the birth-rate of the previous quarter, that of the county districts is of the same amount, but that of the smaller burghs is 1·0 less, and that of the larger burghs is 2·1 less.

In the larger burghs taken individually the quarterly birth-rate varied from 35·9 in Greenock, 35·2 in Coatbridge, 34·1 in Hamilton, and 32·8 in Motherwell, to 22·6 in Perth, 24·4 in Edinburgh, and 26·0 in Kirkcaldy. In Glasgow this rate was 30·9; in Dundee, 29·1; and in Aberdeen, 30·4.

In burghs with censal populations of between 10,000 and 30,000 the birth-rate varied from 44·5 in Port-Glasgow, 39·2 in Dunfermline, 38·8 in Wishaw, 37·5 in Johnstone, and 36·0 in Airdrie, to 19·7 in Galashiels, 24·1 in Inverness, 24·3 in Forfar, 25·2 in Rutherglen, 25·7 in Kirkintilloch, and 26·2 in Renfrew.

In county districts with populations of more than 10,000, this rate varied from 38·8 in Annan District of Dumfries, 37·0 in Middle Ward District of Lanark, 36·6 in Bathgate District of Linlithgow, 36·0 in Ayr District of Ayr, 35·8 in Easter Ross District of Ross and Cromarty, and 35·0 in Turriff District of Aberdeen, to 17·3 in Cupar District of Fife, 19·5 in County District of Sutherland, 19·9 in Highland District of Perth, 20·0 in Upper District of Renfrew, 20·1 in St. Andrews District of Fife, and 20·4 in Mainland District of Shetland.

Of the 36,215 children registered, 33,459, or 92·4 per cent., were legitimate, while 2756, or 7·6 per cent., were illegitimate. The legitimate children of the quarter are 1599 fewer than those of the previous quarter, but are 11,477 more than those of the second quarter of last year. The illegitimate children of the quarter are 66 more than those of the previous quarter, and 880 more than those of the second quarter of last year. The number of illegitimate children registered in this quarter is larger than in all quarters since the quarter ending June 30th, 1880. In 1918 the maximum quarterly number of illegitimate children was 2087, and in the first three quarters of 1919 this number was not exceeded; but in the fourth quarter of that year it rose to 2417, in the first quarter of this year to 2690, and in this quarter to 2756.

In the Divisions of the Counties the illegitimate rate of the quarter ranged from 12·7 per cent. in the North-Eastern, and 12·1 in the Southern, to 6·4 in the South-Western, and 6·8 in the West-Midland. In the Northern Division it was 8·2, in the East-Midland 7·6, in the North-Western 7·4, and in the South-Eastern 7·4.

In the counties, burghs included, this rate varied from 15·6 per cent. in Kirkcudbright, 14·6 in Argyll, 14·4 in Wigtown, 14·3 in Selkirk, and 14·0 in Nairn, to 1·9 in Orkney, 4·9 in Dumbarton, 5·2 in Peebles, 5·5 in Renfrew, and 5·9 in Berwick and in Fife.

In the larger burghs taken collectively this rate was 7·0, in the smaller burghs 7·4, and in the county districts 8·7. In the previous quarter these three rates were 6·5, 6·5, and 8·6 respectively.

In the larger burghs taken individually this rate varied from 9·1 per cent. in Dundee, 8·6 in Aberdeen, 8·2 in Edinburgh, 7·8 in Perth, and 7·7 in Ayr, to 3·1 in Clydebank, 4·2 in Greenock, 4·2 in Kirkcaldy, and 4·5 in Falkirk.

In burghs with populations of between 10,000 and 30,000 the illegitimate rate varied from 14·1 per cent. in Galashiels, 10·9 in Barrhead, and 9·0 in Hawick, to 2·7 in Dunfermline, 2·9 in Rutherglen, 3·2 in Airdrie, 3·6 in Buckhaven, Methil and Innerleven, and 3·9 in Port-Glasgow.

In county districts with populations of more than 10,000 it varied from 22·1 per cent. in Turriff District of Aberdeen, 20·0 in Deeside District of Aberdeen, 18·7 in Garioch District of Aberdeen, 18·2 in Banff District of Banff, 18·0 in Deer District of Aberdeen, 16·5 in Aberdeen District of Aberdeen, and 15·5 in County District of Caithness and in Rhins

TABLE II.—Number of Births, Deaths, and Marriages in Scotland, and their Proportion to the Population, estimated to the middle of each year, during each Quarter of the Years 1910 to 1920 inclusive.

District of Wigtown, to 2·0 in Lorn District of Argyll, and 3·1 in Calder District of Midlothian and in Linlithgow District of Linlithgow.

Births registered in April numbered 12,694; in May, 12,195; and in June, 11,326. The monthly birth-rate in April was 31·5, in May 29·3, and in June 28·1. Compared with the number in the corresponding month of the previous year, that of children registered in April is 5160 more; in May, 4050 more; and in June, 3147 more. The birth-rate of April is 12·8 more, that of May 10·8 more, and that of June 7·8 more than in the previous year.

The birth-rate of the quarter in England and Wales was 26·6, which is 3·0 less than the Scottish rate.

MARRIAGES.

Marriages registered during the quarter numbered 11,881. This number is 130 more than that of the previous quarter, 240 more than that of the second quarter of last year, 3100 more than the mean of those of the second quarters of the preceding five years, and 3261 more than the mean of those of the second quarters of the preceding ten years. It is the largest number registered in a second quarter since the institution of national registration in 1855, and has been exceeded only once in any quarter, that of the third quarter of last year being 12,266, or 385 more.

The marriage-rate of the quarter is 9·7 per thousand. It is 0·1 more than that of the previous quarter, 0·2 more than that of the second quarter of last year, 2·4 more than the mean of those of the second quarters of the preceding five years, and 2·5 more than the mean of those of the second quarters of the preceding ten years. It is the highest Scottish quarterly marriage-rate yet recorded, that of the third quarter of last year excepted, it being 9·9.

In the Divisions of the Counties the quarterly marriage-rate varied from 10·7 in the South-Western, 10·4 in the South-Eastern, and 10·2 in the Southern, to 5·2 in the Northern, and 6·4 in the North-Western. In the West-Midland it was 7·4; in the East-Midland, 8·4; and in the North-Eastern, 9·9.

In the counties this rate varied from 11·8 in Dumfries, 11·2 in Midlothian, 11·2 in Lanark, and 11·0 in Aberdeen, to 2·7 in Sutherland, 3·1 in Shetland, 4·2 in Kinross, 5·0 in Orkney, 5·5 in Argyll, and 5·8 in Ross and Cromarty.

In the larger burghs taken collectively this rate was 11·6; in the smaller burghs, 9·4; and in the county districts, 6·9. In the previous quarter these three rates were 11·5, 9·5 and 6·7 respectively: while in the second quarter of last year they were 11·8, 9·1 and 6·1 respectively.

In the larger burghs the quarterly marriage-rate varied from 13·1 in Edinburgh, 12·8 in Ayr, 12·6 in Aberdeen, and 12·5 in Glasgow, to 6·8 in Clydebank, 7·1 in Coatbridge, 7·2 in Kirkcaldy, 8·1 in Motherwell, and 8·6 in Leith. In burghs with populations of between 10,000 and 30,000 this rate varied from 16·9 in Port-Glasgow, 16·1 in Inverness, and 15·8 in Dumfries, to 5·0 in Peterhead, 5·6 in Grangemouth, 6·0 in Cowdenbeath, 6·2 in Forfar, 6·8 in Kirkintilloch, and 6·9 in Borrowstounness. In county districts with populations of over 10,000 it varied from 10·8 in Annan District of Dumfries, 10·5 in Western District of Dumbarton, 9·6 in Ayr District of Ayr, 9·2 in Rhins District of Wigtown, 9·1 in Dunfermline District of Fife, and 9·0 in Calder District of Midlothian, to 1·4 in Skye District of Inverness, 1·4 in Mainland District of Shetland, 2·8 in County

District of Sutherland, 3·4 in Keith District of Banff, and 3·9 in Western District of Stirling.

Marriages registered in Scotland during April numbered 4020; in May, 2337; and in June, 5524, the equivalent annual marriage-rate of April being 10·0; of May, 5·6; and of June, 13·7. Compared with the corresponding rate of last year, that of April is of the same amount, while that of May is 0·5 more, and that of June is 0·1 more.

DEATHS.

Deaths registered in Scotland during the quarter numbered 18,248. This number is 677 less than that of the previous quarter, but is 1640 more than that of the second quarter of last year, 130 more than the mean of those of the second quarters of the preceding five years, and 123 more than the mean of those of the preceding ten years.

The death-rate of the quarter was 14·9. It is 0·6 less than that of the previous quarter, but 1·3 more than that of the second quarter of last year. It is 0·1 less than the mean of those of the second quarters of the preceding five years, and 0·3 less than the mean of those of the second quarters of the preceding ten years. This is the third consecutive year in which the death-rate of the second quarter has been less than 15; in all other years it was more than that amount.

In the Divisions of the Counties the quarterly death-rate varied from 17·9 in the Northern, and 15·7 in the North-Western and in the South-Western, to 13·2 in the West-Midland and in the South-Eastern. In the Southern Division it was 15·4; in the East-Midland, 14·9; and in the North-Eastern, 14·6.

In the counties, burghs included, the death-rate varied from 20·7 in Caithness, 18·9 in Orkney, 18·3 in Nairn, 17·2 in Forfar, and 17·1 in Wigtown, to 11·8 in Berwick, 12·0 in Clackmannan, 12·1 in Stirling, and 12·2 in Haddington, in Kinross and in Linlithgow.

In the larger burghs taken collectively the quarterly death-rate was 15·6; in the smaller burghs, 14·5; and in the county districts, 14·0. In the previous quarter these three rates were 15·9, 16·0 and 14·4. In the second quarter of last year they were 13·5, 13·4 and 13·1.

In the larger burghs taken individually the death-rate ranged from 18·2 in Dundee, 17·8 in Greenock, and 17·0 in Hamilton, to 11·6 in Ayr, 11·8 in Kilmarnock, and 12·4 in Clydebank. In Glasgow this rate was 16·7; in Kirkcaldy, 16·4; in Coatbridge, 15·4; in Motherwell, 14·8; in Leith, 14·6; in Aberdeen, 14·1; in Perth, 14·0; in Paisley, 13·8; in Falkirk, 13·6; and in Edinburgh, 13·5.

In burghs with populations of between 10,000 and 30,000 the quarterly death-rate varied from 19·7 in Galashiels, 19·3 in Arbroath, 18·2 in Port-Glasgow, 17·8 in Airdrie, 17·7 in Forfar, and 17·3 in Montrose, to 9·0 in Grangemouth, 9·3 in Musselburgh, 9·3 in Renfrew, 10·0 in Fraserburgh, 10·3 in Barrhead, and 10·6 in Kirkintilloch.

In county districts with populations of more than 10,000 this rate varied from 21·4 in Central District of Perth, 19·9 in Easter Ross District of Ross and Cromarty, 19·4 in County District of Caithness, 19·4 in Skye District of Inverness, and 18·8 in Mid-Ross District of Ross and Cromarty, to 8·8 in County District of Clackmannan, 9·1 in St. Andrews District of Fife, 9·9 in Lower Ward District of Lanark, 10·8 in Upper District of Renfrew, and 10·9 in Suburban District of Midlothian, and in Kirkcaldy District of Fife.

Deaths registered in April numbered 6751; in May 6364; and in June 5133. The Scottish monthly death-rate in April was 16·7; in May 15·3; and in June 12·7. Compared with the death-rate of the corresponding month of last year, that of April is 0·8 more; that of May 2·1 more; and that of June 1·1 more.

The death-rate of the quarter in England and Wales was 13·0 per thousand. It is 1·9 less than the Scottish rate.

AGES OF THOSE DYING.

Of the 18,248 persons whose deaths were registered during the quarter, 4830, or 26·5 per cent., were aged less than five years, 7895, or 43·3 per cent., were aged more than five but less than sixty-five, and 5521, or 30·2 per cent., were aged sixty-five or over. In two instances the age at death was not recorded. Compared with the number in the previous quarter, that of children of less than five years old is 69 more, but that of persons aged five to sixty-five is 65 less, and that of persons aged sixty-five and over is 682 less. Compared with the number in the second quarter of last year, that of children of less than five is 1038 more, and that of persons aged five to sixty-five is 758 more, but that of persons aged sixty-five and over is 155 less.

Deaths of children of less than one year old numbered 3482. This number is 16 more than in the previous quarter, and 1232 more than in the second quarter of last year. The increased number of these deaths as compared with the second quarter of last year fully accounts for the increased number of deaths at ages under five, and no doubt is largely attributable to the high recent birth-rate, with the consequent greater number of children exposed to the risk of death. The equivalent infantile mortality rate is 96 per thousand registered births. This rate is 4 more than that of the previous quarter, and 2 more than that of the second quarter of last year. This is the fifth consecutive quarter in which this rate has been less than 100.

In the Divisions of the Counties the infantile mortality rate of the quarter varied from 107 in the East-Midland, and 105 in the Northern, to 61 in the North-Western, 74 in the West-Midland, and 77 in the Southern. In North-Eastern it was 99; in the South-Western, 99; and in the South-Eastern, 96.

In the counties, burghs included, this rate ranged from 178 in Caithness, 151 in Selkirk, 144 in Forfar, 116 in Kirkeudbright, and 108 in Linlithgow, to 30 in Berwick, 34 in Bute, 39 in Peebles, 49 in Orkney, and 50 in Clackmannan.

In the larger burghs taken collectively the quarterly infantile mortality rate was 109; in the smaller burghs, 90; and in the county districts, 80. In the previous quarter these three rates were respectively 103, 82, and 79, and in the second quarter of last year were 106, 86, and 81.

In the larger burghs taken individually this rate varied from 168 in Dundee, 125 in Kirkcaldy, and 122 in Hamilton, to 74 in Kilmarnock, 78 in Clydebank, 81 in Ayr, and 82 in Paisley and in Falkirk. In Glasgow it was 109, in Edinburgh 102, and in Aberdeen 109.

In smaller burghs with populations of between 10,000 and 30,000 the infantile mortality rate ranged from 197 in Galashiels, 181 in Buckhaven, Methil and Innerleven, 169 in Forfar, and 149 in Peterhead, to 20 in Barrhead, 38 in Kirkintilloch, 42 in Renfrew, 44 in Johnstone, and 45 in Dumfries and in Hawick.

In county districts with populations of more than 10,000 this rate varied from 143 in Ellon District of Aberdeen, 131 in Carrick District of Ayr, 124 in County District of Caithness, 113 in Ayr District of Ayr, and 111 in Bathgate District of Linlithgow, to 19 in Western District of Perth, 27 in St. Andrews District of Fife, 30 in Forfar District of Forfar, 34 in Perth District of Perth, and 35 in Upper District of Renfrew.

CAUSES OF DEATH.

Of the 18,248 deaths registered during the quarter, 1098, or 6.0 per cent., were attributed to the principal epidemic diseases, and included 19 from enteric fever, 382 from measles, 41 from scarlet fever, 201 from whooping-cough, 165 from diphtheria (those attributed to croup included), and 290 from the diarrhœas of childhood, *i.e.* deaths from diarrhœa or enteritis among children of less than two years old. Compared with the number in the previous quarter, deaths from the diarrhœas of childhood are 75 more, from measles 45 more, and from whooping-cough 24 more, but those from diphtheria are 73 fewer, from scarlet fever 25 fewer, and from enteric fever 5 fewer.

The principal epidemic diseases rate of the quarter was 0.9 per thousand. It is the same as that of the previous quarter, but is 0.1 less than that of the second quarter of last year. The quarterly death-rate from measles was 31 per 100,000; from the diarrhœas of childhood, 24; from whooping-cough, 16; from diphtheria, 13; from scarlet fever, 3; and from enteric fever, 2.

In the counties, burghs included, the principal epidemic diseases death-rate varied from 1.3 in Lanark, 1.2 in Kincardine and in Renfrew, and 1.0 in Wigtown, to 0 in Bute, in Kinross, in Nairn, in Peebles, and in Sutherland. In the larger burghs it was relatively high in Hamilton (1.7), in Glasgow (1.4), in Paisley (1.4), in Clydebank (1.2), and in Perth (1.1). In burghs with populations of 10,000 to 30,000 it was relatively high in Port-Glasgow (3.5), in Johnstone (2.0), in Cowdenbeath (1.5), in Kirkintilloch (1.3), in Dunfermline (1.2), in Forfar (1.2), and in Irvine (1.2). In Garioch District of Aberdeen it was 1.6; in Middle Ward District of Lanark, 1.5; in Ellon District of Aberdeen, 1.3; and in Lorn District of Argyll, 1.3. In 9 county districts with populations of more than 10,000, and in 4 of the smaller burghs with similar populations, no deaths from the principal epidemic diseases were registered; these 4 burghs were Barrhead, Montrose, Musselburgh and Renfrew.

Deaths from epidemic or infectious diseases other than those classed as the principal epidemic diseases included 1 from typhus fever, 11 from malaria, 50 from small-pox, 35 from erysipelas, and 35 from cerebro-spinal meningitis.

Of the 50 persons dying from small-pox, 29 are reported to have been successfully vaccinated and 19 not to have been vaccinated, while in two instances vaccination was doubtful. Of them, 45 occurred in Glasgow, 2 in the Middle Ward District of Lanark, and 1 each in Dundee, in Airdrie, and in Coatbridge. Of the 29 vaccinated persons dying from this cause, 24 were 35 years old or over, the remaining 5 being between 15 and 34. Of the 19 unvaccinated persons, 18 were less than 35, 14 of them being less than 10 years old, and 4 were between 10 and 35. Of the 50 persons dying from small-pox during the quarter, 22 were male and 28 female.

Deaths from all forms of tuberculous disease numbered 1645, and

constituted 9.0 per cent. of the total deaths of the quarter. These deaths are 38 more than in the previous quarter, but 143 fewer than in the corresponding quarter of last year. They equal a death-rate of 134 per 100,000, which rate is 3 more than that of the previous quarter, but 12 less than that of the corresponding quarter of last year. These deaths include 1120 from phthisis, 166 from tuberculous meningitis, 153 from abdominal tuberculosis, and 206 others. Compared with the number in the previous quarter, that from phthisis is 16 less, but that from tuberculous meningitis is 14 more, and that from abdominal tuberculosis is 29 more. The quarterly death-rate from phthisis was 92 per 100,000; it is 1 less than that of the previous quarter, and 4 less than that of the second quarter of last year.

Deaths from malignant disease numbered 1444, and equalled a death-rate of 118 per 100,000; they number 30 more than in the previous quarter, and 88 more than in the second quarter of last year. Deaths from apoplexy numbered 1117, and from heart disease 1720, the former being 136, and the latter 48, fewer than in the previous quarter.

Deaths from pneumonia numbered 2255, and constituted 12.4 per cent. of the total deaths of the quarter; they equal a death-rate of 184 per 100,000. They are 342 more than in the previous quarter, and 697 more than in the second quarter of last year. Deaths from bronchitis numbered 1298, constituted 7.1 per cent. of the total, and equal a death-rate of 106 per 100,000. They are 289 fewer than in the previous quarter, but 293 more than in the second quarter of last year.

Deaths from influenza in all numbered 753, of which 124 were attributed solely to influenza, and 629 to influenza complicated by some other disease. The total number is higher than in all quarters since the first quarter of last year, when influenza deaths numbered 6282. In the second quarter of last year these deaths numbered 646, and in the third quarter of that year the number fell to 82; but since then it has been increasing, being 135 in the fourth quarter of that year, 351 in the first quarter of this year, and is now found to be 753 in the second quarter. In January of this year influenza deaths numbered 83; in February 72; in March 196; in April 394; in May 293; and in June 66; these figures showing that there was an epidemic of this disease lasting from March to May, and reaching its maximum in April. A table showing the age distribution of those dying from influenza, and also the nature of the complicating diseases is appended, and from it there may be gathered that, while this epidemic was very much smaller than the great epidemic of 1918 to 1919, it was of the same type, as the age distribution of those dying is similar, as is also the frequency in which pneumonia was a complicating cause.

Deaths attributed to violent causes numbered 702. They are 82 fewer than in the previous quarter, and 17 fewer than in the second quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 232. They are 26 fewer than in the previous quarter, but 121 more than in the second quarter of last year. They equal a death-rate of 6.4 per 1000 registered births.

Deaths of which the causes were ill-defined numbered 256, and those of which the cause was unspecified or merely described as "Natural Causes" numbered 94. The former included 181 attributed to heart failure, 42 to syncope, 10 to dropsy, and 7 to sudden death not otherwise defined.

•

TABLE III.—DEATHS FROM INFLUENZA DURING QUARTER ENDING
30TH JUNE 1920.

| | Total. | Males. | Females. | Age Distribution. | | | | | |

REPORT.

REPORT ON THE BIRTHS, DEATHS AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH SEPTEMBER 1920.

THE more outstanding features of the vital statistics of Scotland in the Third Quarter of the year 1920 are a falling birth-rate, an exceptionally high marriage-rate—the highest on record—and a low death-rate. The birth-rate of the quarter was 25·6 per thousand; it is 4·0 less than that of the previous quarter. Following the Armistice and the demobilisation of the troops there was a marked increase in the birth-rate, but as the birth-rate of this quarter may be described as of pre-war level, that rise may now be considered as passed. The marriage-rate of the quarter was 10·3, which is higher than those of all previous quarters since 1855, when national registration was instituted. The death-rate of the quarter was 11·3; in only two previous quarters were lower Scottish death-rates recorded, these two quarters being the third quarter of 1919 and the third quarter of 1917. The principal epidemic diseases rate of the quarter was low; it was only 0·6 per thousand. The epidemic of small-pox referred to in the two previous quarterly reports was continued in this quarter, and indeed attained a maximum in it, for the deaths recorded numbered 69, which is 19 more than in the last quarter. In the report on the statistics of the second quarter attention was drawn to the unusual number of illegitimate children; in this quarter that number was 2389, which, while being 367 less than in that quarter, is more than average; it is 331 more than in the third quarter of last year.

BIRTHS.

Births registered in Scotland during the quarter ending 30th September 1920 numbered 31,626. This number is 4589 less than that of the previous quarter, but is 6202 more than that of the third quarter of last year, 6192 more than the mean of those of the third quarters of the preceding five years, and 3939 more than the mean of those of the third quarters of the preceding ten years. It is less than the number registered in each of the three preceding quarters, but more than in any other quarter subsequent to the second quarter of the year 1914.

The quarterly birth-rate was 25·6 per thousand. It is 4·0 less than that of the second quarter of this year, 5·3 less than that of the first quarter of this year, and 2·3 less than that of the fourth quarter of last year, but it is higher than those of all other quarters subsequent to the second quarter of the year 1915. It is 4·8 more than the mean of the rates of the third quarters of the preceding five years, and 2·7 more than the mean of those of the third quarters of the preceding ten years. A distinct post-war rise of birth-rate was observed in the fourth quarter of last year, 1919, when it rose from 20·5 (in the previous quarter) to 27·9, and this rise attained a maximum of 30·9 in the first quarter of this year, but since then the rate has been falling. It fell to 29·6 in the second quarter, and is now found to be 25·6. The average third quarterly birth-rate in the

last five years unaffected by the war—1910 to 1914—was 25·1, and from this average the rate of this quarter differs but little.

Of the 31,626 children whose births were registered during the quarter, 16,111 were male and 15,515 were female, the ratio of male to female children being 103·8 to 100. In the previous quarter this ratio was 105·0 to 100.

In the Divisions of the Counties the quarterly birth-rate varied from 27·6 in the South-Western, 25·6 in the North-Eastern, and 25·4 in the Southern, to 19·5 in the North-Western, and 19·8 in the Northern. In the East-Midland it was 24·4; in the West-Midland, 24·2; and in the South-Eastern, 23·4.

In the counties this rate ranged from 32·0 in Clackmannan, 29·5 in Kincardine, and 29·4 in Linlithgow, to 14·4 in Sutherland, 15·4 in Shetland, and 16·4 in Peebles.

In the larger burghs, those with populations exceeding 30,000, when taken collectively, the quarterly birth-rate was 25·6; in the smaller burghs, 25·2; and in the county or extra-burghal public health districts, 25·7. Compared with that of the previous quarter, the larger burgh rate is 4·3 less, the smaller burgh rate is 3·4 less, and the county district rate is 4·6 less.

In the larger burghs taken individually the quarterly birth-rate varied from 31·7 in Hamilton, 31·3 in Greenock, 31·3 in Coatbridge, and 27·5 in Kirkcaldy, to 19·8 in Perth, 20·9 in Edinburgh, 23·5 in Dundee, and 23·9 in Ayr.

In burghs with censal populations of between 10,000 and 30,000, *i.e.* those of the smaller burghs with populations of more than 10,000, this rate varied from 37·5 in Port-Glasgow, 35·1 in Irvine, 32·8 in Alloa, and 32·2

in Dumbarton, to 16·5 in Galashiels, 19·7 in Rutherglen, 21·0 in Hawick, and 21·6 in Grangemouth.

In county districts with censal populations of more than 10,000, this rate varied from 39·2 in Annan District of Dumfries, 34·6 in County District of Clackmannan, and 34·5 in Middle Ward District of Lanark, to 14·9 in County District of Sutherland, 15·0 in Mainland District of Shetland, and 16·0 in Skye District of Inverness.

Of the 31,626 children whose births were registered during the quarter, 29,237, or 92·4 per cent., were legitimate, while 2389, or 7·6 per cent., were illegitimate. The legitimate children of the quarter are 4222 less than those of the previous quarter, but 5882 more than those of the corresponding quarter of last year. The illegitimate children of the quarter are 367 less than those of the previous quarter, but 331 more than those of the corresponding quarter of last year. In the report dealing with the statistics of the second quarter of this year it was pointed out that the number of illegitimate children registered was unusually high, being higher than in all quarters subsequent to the second quarter of the year 1880; that number appears to have been the maximum of the post-war rise, for the number registered in this quarter is not only less than it, but is also less than those of the first quarter of this year and that of the fourth quarter of last year. The actual numbers registered in the four quarters of last year were 2069, 1876, 2058 and 2417 respectively, while those registered in the three quarters of this year numbered 2690, 2756 and 2389 respectively.

The illegitimate rate of the quarter, 7·6 per cent. of the total births registered, is the same as that of the previous quarter, but is 0·5 less than that of the third quarter of last year.

In the Divisions of the Counties the illegitimate rate varied from 13·9 per cent. in the North-Eastern, 11·4 in the Northern, and 10·5 in the Southern, to 5·8 in the West-Midland, 6·5 in the South-Western, and 6·9 in the North-Western. In the East-Midland it was 7·6, and in the South-Eastern 7·0.

In the counties this rate varied from 17·6 in Moray, 14·5 in Caithness, 13·9 in Aberdeen, 13·3 in Wigtown, and 13·1 in Banff, to 2·0 in Selkirk, and 4·1 in Haddington and in Dumbarton.

In the larger burghs taken collectively this rate was 7·3, in the smaller burghs 6·4, and in the county districts 8·6. In the previous quarter these three rates were 7·0, 7·4, and 8·7 respectively.

In the larger burghs taken individually this rate varied from 11·0 in Perth, 10·1 in Aberdeen, and 9·9 in Ayr, to 3·8 in Clydebank, 4·2 in Motherwell, and 4·6 in Greenock.

In those of the smaller burghs, which have populations of over 10,000, it varied from 10·2 in Montrose, 9·0 in Irvine, and 8·8 in Fraserburgh, to 0 in Galashiels, 1·7 in Grangemouth, and 2·2 in Dumbarton.

In county districts with populations of over 10,000 it varied from 26·0 in Turriff District of Aberdeen, 23·6 in Ellon District of Aberdeen, 23·6 in Rhins District of Wigtown, and 22·6 in County District of Caithness, to 2·0 in Lorn District of Argyll, 2·3 in Calder District of Midlothian, and 2·5 in Kilmarnock District of Ayr and in County District of Clackmannan.

Births registered in July numbered 11,089; in August, 10,557; and in September, 9980. The monthly birth-rate in July was 26·6; in August, 25·3; and in September, 24·7. The births registered in July number 2694 more than in the corresponding month of last year, those registered in

| Marriages, | 30866 | 6·5 | 31811 | 6·7 | 32510 | 6·9 | 33691 | 7·1 | 35049 | 7·4 | 36272 | 7·6 | 31483 | 6·5 | 30486 | 6·3 | 34600 | 7·1 | 44137 | 9·0 | | |

August 2444 more, and those registered in September 1075 more, and a similar comparison of birth-rate shews that of July to be 6·5 higher, that of August to be 5·8 higher, and that of September to be 2·6 higher.

The birth-rate of the quarter in England and Wales was 24·3 per thousand, which is 1·3 less than the Scottish rate.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 12,702. This number is 821 more than that of the previous quarter, 434 more than that of the third quarter of last year, 3320 more than the mean of the numbers of the third quarters of the preceding five years, and 3653 more than the mean of those of the preceding ten years. This is the largest number of marriages registered in one quarter since the introduction of national registration in 1855, the previous largest number being that of the third quarter of last year.

The quarterly marriage-rate is 10·3 per thousand, and is the highest quarterly Scottish marriage-rate yet reported. It is 0·6 more than that of the previous quarter, 0·4 more than that of the third quarter of last year, 2·6 more than the mean of the rates of the third quarters of the preceding five years, and 2·8 more than the mean of those of the third quarters of the preceding ten years. The marriage-rate of this quarter and those of the five preceding quarters average 9·7, while the maximum quarterly rate of all quarters previous to April 1919 was 8·9. In the 257 quarters dealt with in these reports of dates previous to April 1919 a marriage-rate of 8 per thousand or upwards only occurred 22 times, and then only in fourth quarters, while in the six quarters that have elapsed since that date the rate has been 9·2 or more.

In the Divisions of the Counties the quarterly marriage-rate varied from 11·7 in the South-Eastern, and 11·4 in the South-Western, to 4·9 in the Northern, and 5·7 in the North-Western. In the North-Eastern, it was 9·5; in the East-Midland, 9·2; in the West-Midland, 8·1; and in the Southern, 7·7.

In the counties, burghs included, this rate varied from 13·4 in Midlothian, 12·1 in Lanark, 10·5 in Aberdeen, and 10·4 in Clackmannan and in Forfar, to 3·4 in Shetland, 3·6 in Sutherland, 4·2 in Argyll, 4·5 in Ross and Cromarty, and 4·6 in Haddington and in Orkney.

In the larger burghs taken collectively the quarterly marriage-rate was 12·9; in the smaller burghs, 10·0; and in the county districts, 6·2.

In the previous quarter these three rates were 11·6, 9·4 and 6·9 respectively, and in the third quarter of last year they were 12·7, 9·6 and 5·8.

In the larger burghs taken individually the marriage-rate ranged from 15·8 in Edinburgh, 14·0 in Ayr, and 13·9 in Aberdeen, to 8·0 in Clydebank, 8·6 in Kilmarnock, and 9·2 in Motherwell. In Glasgow this rate was 13·2, and in Dundee, 12·2.

In burghs with populations of between 10,000 and 30,000 this rate varied from 20·1 in Irvine, 18·4 in Dumfries, and 18·3 in Inverness, to 6·4 in Kirkintilloch, and 7·0 in Buckhaven, Methil and Innerleven, and in Montrose.

In county districts with populations of more than 10,000 this rate varied from 10·3 in Western District of Dumbarton, and 9·3 in Middle Ward District of Lanark and in Upper District of Renfrew, to 1·0 in Skye District of Inverness, 1·6 in Ellon District of Aberdeen, and 1·8 in Lews District of Ross and Cromarty.

Marriages registered in Scotland in the month of July numbered 5596; in August, 3289; and in September, 3817. Compared with the number registered in the corresponding month of last year, that of July is 477 more, and that of August is 103 more, but that of September is 140 less. The monthly marriage-rate of July was 13·4; of August, 7·9; and of September, 9·5. Compared with that of the corresponding months of last year the July rate is 1·1 more, and the August rate 0·3 more, but the September rate is 0·3 less.

DEATHS.

Deaths registered in Scotland during the quarter numbered 13,948. This number is 4300 less than in the previous quarter, but 625 more than in the third quarter of last year. It is 693 less than the mean of the numbers of the third quarters of the preceding five years, and 1285 less than the mean of those of the third quarters of the preceding ten years. This number, 13,948, is less than that registered in all quarters since the institution of national registration with the exception of seven, those of the third quarters of the years 1855, 1856, 1859, 1860, 1861, 1917 and 1919.

The quarterly death-rate was 11·3 per thousand. It is 3·6 less than that of the previous quarter, but 0·5 more than that of the third quarter of last year. It is 0·7 less than the mean of those of the third quarters of the preceding five years, and 1·3 less than the mean of those of the third quarters of the preceding ten years. It is lower than all quarterly Scottish death-rates with the exception of two, those of the third quarter of 1919, and the third quarter of 1917.

In the Divisions of the Counties the quarterly death-rate varied from 14·0 in the North-Western, 13·2 in the Southern, and 13·1 in the Northern, to 10·6 in the South-Eastern, 10·7 in the East-Midland, and 10·8 in the West-Midland. In the North-Eastern Division this rate was 11·4, and in the South-Western, 11·3.

In the counties this rate varied from 14·5 in Orkney, 14·3 in Ross and Cromarty, 14·2 in Dumfries, and 14·0 in Wigtown, to 8·9 in Kinross, 9·3 in Haddington, 9·5 in Nairn, and 9·6 in Berwick and in Dumbarton.

In the larger burghs taken collectively the death-rate was 11·4; in the smaller burghs, 11·7; and in the county districts, 10·9. In the previous quarter these three death-rates were 15·6, 14·5 and 14·0 respectively, and in the third quarter of last year they were 10·6, 11·0 and 10·6 respectively.

In the larger burghs taken individually the quarterly death-rate ranged from 13·5 in Coatbridge, 12·8 in Ayr, 12·6 in Kirkcaldy, and 12·5 in Leith, to 8·6 in Clydebank, 9·0 in Motherwell, 9·1 in Falkirk, and 9·4 in Perth. In Glasgow this rate was 11·9; in Edinburgh, 10·6; in Dundee, 11·1; and in Aberdeen, 10·9.

In those of the smaller burghs which have populations of more than 10,000 this rate varied from 17·3 in Irvine, 16·7 in Inverness, and 16·2 in Montrose, to 6·8 in Cowdenbeath, 8·2 in Buckhaven, Methil and Innerleven, and 8·9 in Borrowstounness.

In county districts with populations of more than 10,000 the death-rate ranged from 17·7 in Annan District of Dumfries, and 16·4 in Skye District of Inverness and in Central District of Perth, to 7·4 in St. Andrews District of Fife, 7·6 in Lasswade District of Midlothian, 8·2 in Kirkcaldy District of Fife, and 8·3 in the Western District of Haddington and in Upper District of Renfrew.

Deaths registered in Scotland in July numbered 4728; in August, 4695; and in September, 4525. The Scottish monthly death-rate for July

was 11·3; for August, 11·3; and for September, 11·2. Compared with the death-rate of the corresponding month of last year, that of July is 0·3 more, and that of August is 1·3 more, but that of September is 0·1 less.

The death-rate of the quarter in England and Wales was 10·1. It is 1·2 lower than the Scottish rate.

AGES OF THOSE DYING.

Of the 13,948 persons whose deaths were registered during the quarter, 3084, or 22·1 per cent., were aged less than five years old; 6322, or 45·3 per cent., were aged more than five but less than sixty-five; and 4540, or 32·6 per cent., were aged sixty-five or over. In two instances the age at death was unstated. Compared with the numbers in the previous quarter, deaths among children of less than five years old are 1746 fewer, those among persons aged between five and sixty-five are 1573 fewer, and those among persons of sixty-five and over are 981 fewer. Compared with the number of the third quarter of last year, those among children of less than five years old are 173 fewer, those among persons aged between five and sixty-five are 342 more, and those among persons of sixty-five and over are 108 more.

Deaths of children of less than one year old numbered 2356. This number is 1126 less than that of the previous quarter, but 364 more than that of the corresponding quarter of last year. The equivalent annual infantile mortality rate is 74 per thousand registered births. This rate is 22 less than that of the previous quarter, and 4 less than that of the third quarter of last year. This is the sixth consecutive quarter in which this rate has been less than 100. The infantile mortality rate of this quarter, 74, is the lowest Scottish quarterly rate yet recorded, with the exception of that for the fourth quarter of last year, when it was also 74. Otherwise the previous lowest was that of the third quarter of last year, which was 78. Previous to 1913 the quarterly infantile mortality rates were not included in these reports, and the foregoing statement consequently only applies to reports published since that date.

In the counties, burghs included, the infantile mortality rate varied from 90 in Forfar, 88 in Selkirk, and 87 in Wigtown, to 39 in Bute and in Kinross, and 47 in Roxburgh. In the larger burghs it varied from 109 in Ayr, 104 in Dundee, and 94 in Motherwell, to 23 in Falkirk, 47 in Kilmarnock, and 56 in Greenock and in Clydebank. In Glasgow it was 86; in Edinburgh, 67; and in Aberdeen, 91. In smaller burghs with populations of over 10,000 this rate varied from 138 in Inverness, 124 in Irvine, and 117 in Galashiels, to 17 in Grangemouth, 32 in Alloa, and 50 in Borrowstounness. In county districts with populations of more than 10,000 it varied from 117 in Cupar District of Fife, 115 in Keith District of Banff, and 105 in Annan District of Dumfries, to 21 in Deeside District of Aberdeen, 25 in Western District of Dumbarton, and 27 in Upper District of Renfrew.

In the larger burghs taken collectively this rate was 81; in the smaller burghs, 73; and in the county districts, 65. In the previous quarter these three rates were 109, 90, and 80 respectively, and in the third quarter of last year they were 86, 75, and 67.

CAUSES OF DEATH.

Of the 13,948 deaths registered, 780, or 5·6 per cent. of the total, were attributed to the principal epidemic diseases. This number includes

21 from enteric fever, 61 from measles, 52 from scarlet fever, 113 from whooping-cough, 117 from diphtheria, and 416 from the diarrhoeas of children of less than two years old. Compared with the number in the previous quarter the total deaths from these causes are 318 fewer, and compared with the number in the third quarter of last year they are 133 fewer. Compared with the number in the previous quarter deaths from enteric fever are 2 more, those from scarlet fever are 11 more, and those from the diarrhoeas of childhood are 126 more, but those from measles are 321 fewer, from whooping-cough 88 fewer, and from diphtheria 48 fewer. Compared with the number in the third quarter of last year, deaths from enteric fever are 1 more, from scarlet fever 12 more, and from the diarrhoeas of childhood 9 more, but those from measles are 77 fewer, from whooping-cough 48 fewer, and from diphtheria 30 fewer.

The principal epidemic diseases death-rate was 0·6 per thousand. It is 0·3 less than in the previous quarter, and 0·1 less than in the third quarter of last year. The quarterly death-rate from enteric fever was 2 per 100,000; from measles, 5; from scarlet fever, 4; from whooping-cough, 9; from diphtheria, 9; and from the diarrhoeas of childhood, 34.

In the counties, burghs included, the principal epidemic diseases rate of the quarter ranged from 1·0 per thousand in Linlithgow, 0·9 in Nairn, and 0·8 in Forfar, in Lanark and in Stirling, to 0 in Bute, in Kinross, in Selkirk and in Sutherland. In the larger burghs it ranged from 1·0 in Dundee, and 0·9 in Paisley, in Coatbridge and in Ayr, to 0·3 in Edinburgh, 0·4 in Aberdeen and in Perth. In smaller burghs with populations of more than 10,000 it varied from 3·2 in Irvine, and 1·4 in Borrowstounness and in Fraserburgh, to 0 in Buckhaven, Methil and Innerleven, in Forfar, in Galashiels, in Hawick and in Montrose. In county districts with populations of over 10,000 it varied from 1·7 in Thornhill District of Dumfries, 1·4 in Brechin District of Forfar, 1·2 in Linlithgow District of Linlithgow, and 1·2 in Central District of Stirling, to 0 in eleven districts.

Deaths from epidemic diseases other than those classed as the principal epidemic diseases included 5 from typhus fever, 5 from malaria, 69 from small-pox, 27 from erysipelas, 24 from cerebro-spinal meningitis, and 18 from encephalitis lethargica. In the previous quarter deaths from typhus fever numbered 1; from small-pox, 50; and from cerebro-spinal meningitis, 35.

Of the 69 persons dying from small-pox, 42 are reported to have been vaccinated and 27 to have been unvaccinated; of the former all were aged 15 or over, while of the latter 24, all except 3, were under that age. Of the 69 deaths 62 occurred in Lanarkshire, 52 being credited to Glasgow, 2 each to Coatbridge and Rutherglen, 4 to the Lower Ward County District, and 2 to the Middle Ward County District. Of the remaining 7, 3 occurred in the county of Ross and Cromarty, and 1 each in the counties of Dumbarton, Inverness, Renfrew and Stirling.

Deaths from all forms of tuberculosis numbered 1350, and constituted 9·7 per cent. of the total deaths of the quarter. They are 295 fewer than in the previous quarter, but 29 more than in the third quarter of last year. They equal an annual death-rate of 109 per 100,000, which rate is 25 less than that of the previous quarter, but 2 more than that of the third quarter of last year. They included 910 deaths from phthisis, 151 from tuberculous meningitis, 123 from abdominal tuberculosis, and 166 from other tuberculous disease. Compared with the number in the previous quarter, deaths from phthisis are 210 fewer, from tuberculous meningitis 15 fewer, and from abdominal tuberculosis 30 fewer. The

quarterly death-rate from phthisis was 74 per 100,000, which is 18 less than that of the previous quarter, but is 5 more than that of the third quarter of last year.

Deaths from malignant disease numbered 1393, and equalled a death-rate of 113 per 100,000. These deaths are 51 fewer than in the previous quarter, and 48 fewer than in the third quarter of last year. Deaths from apoplexy numbered 989, and from heart disease 1503, the former being 128, and the latter 217, fewer than in the previous quarter.

Deaths from pneumonia numbered 850, constituted 6·1 per cent. of the total, and equalled an annual death-rate of 69 per 100,000. They are 1405 fewer than in the previous quarter, but 117 more than in the third quarter of last year. Deaths from bronchitis numbered 583, constituted 4·2 per cent. of the total, and equalled an annual death-rate of 47 per 100,000. They are 715 fewer than in the previous quarter, but 101 more than in the third quarter of last year.

Deaths from influenza in all numbered 74, of which 22 were attributed solely to influenza, and 52 to influenza complicated by some other disease. The total number is 678 less than in the previous quarter, and 8 less than in the third quarter of last year.

Deaths attributed to violent causes numbered 680. They are 22 fewer than in the previous quarter, and 7 fewer than in the corresponding quarter of last year.

Deaths ascribed to diseases and accidents of pregnancy and childbirth numbered 153. They are 79 fewer than in the previous quarter, but 15 more than in the third quarter of last year. They equal a death-rate of 4·8 per 1000 registered births, which rate in the previous quarter was 6·4, and in the third quarter of last year was 5·4.

Deaths of which the causes were ill-defined numbered 219, and those of which the causes were unspecified or merely described as "Natural Causes" numbered 80. The former included 135 attributed to heart failure and 52 to syncope. In the previous quarter deaths from ill-defined causes numbered 256 and from unspecified causes 94.

* Calculated on revised populations.

REPORT.

THIS report deals more especially with the statistics of the fourth quarter of the year 1920, but as with its completion figures relative to the entire year are now available, a short preliminary statement of them is prefixed. A full report on the vital statistics of the year will in due course be published in the Sixty-sixth Annual Report. The annual figures here given may be accepted as substantially correct, but they are provisional, and will be superseded by those appearing in the Annual Report above referred to.

The more outstanding statistical facts derived from an examination of the annual figures are a high birth-rate and a high marriage-rate, but a low death-rate. The marriage-rate of the year, 9·6 per thousand, is the highest Scottish marriage-rate yet recorded, while the death-rate, 14·0, is the lowest. The birth-rate was 28·1, and is higher than those of all years since 1906. The numbers of births and marriages registered in Scotland during the year both constitute records. Deaths from tuberculous disease, including those from phthisis, show a satisfactory decline, as do also those from measles and whooping-cough, the latter of which were fewer in this than in any previous year. Deaths from malignant disease were more numerous in this than in any previous year, and outnumbered those from phthisis by fully 37 per cent. Small-pox was the cause of death in 152 instances, this number being greater than in any year since 1904.

The quarterly statistics show a birth-rate of 25·0 per thousand, which is considerably below that of recent quarters, and may be described as of pre-war level. The marriage-rate was 8·5 per thousand, which, while being 0·7 less than that of the fourth quarter of the previous year, is 1·1 more than the mean of those of the preceding five fourth quarters, and 1·4 more than the mean of those of the preceding ten fourth quarters. The death-rate was 13·8 per thousand, which is considerably lower than the mean of those of the fourth quarters of recent years.

PRELIMINARY STATEMENT REGARDING THE VITAL STATISTICS OF SCOTLAND IN THE YEAR 1920.

Births registered in Scotland during the year numbered 136,535. This number is 30,267 more than that of the previous year, 31,258 more than the mean of the numbers of the preceding five years, and 22,599 more than the mean of those of the preceding ten years. It is the largest number of births registered in Scotland in any one year, the previous largest number being 133,525, which occurred in 1903. The minimum number of births registered in Scotland in any year, with the exception of 1855, was 97,441; it occurred in 1917, and compared with it the number for 1920 is 39,094, or 40·1 per cent., more. The large number of births registered during the year is associated with, and due to, large numbers in the first two quarters of the year only, there being no marked excess over pre-war averages in those of the latter two quarters.

Marriages registered numbered 46,839. This number is 2702 more than that of the previous year, 11,443 more than the mean of those of the five preceding years, and 12,748 more than the mean of those of the preceding ten years. It is the maximum number of marriages registered in Scotland in any one year, the previous maximum being that of 1919.

Deaths registered numbered 68,179. This number is 6970 less than that of the previous year, 6876 less than the mean of those of the five preceding years, and 5643 less than the mean of those of the ten preceding years. It is less than the number registered in any year subsequent to 1862.

The natural increase of the population of Scotland during the year, the excess of births over deaths, was 68,356, which amount is greater

than in any previous year since the institution of national registration, and that is since 1855. The previous largest number was that of 1896; it amounted to 58,495.

The Scottish birth-rate of the year was 28.1 per thousand. It is 6.4 more than that of the previous year, the same amount more than the mean of those of the preceding five years, and 4.3 more than the mean of those of the preceding ten years. It is higher than the Scottish birth-rate of all years subsequent to 1906.

The annual marriage-rate was 9.6 per thousand. It is 0.6 higher than that of the previous year, 2.3 more than the mean of those of the preceding five years, and 2.5 more than the mean of those of the preceding ten years. This is the second consecutive year in which the marriage-rate has been 9.0 or more; in no other year since 1855 has it exceeded 7.8.

The annual death-rate was 14.0 per thousand. It is 1.4 less than that of the previous year, 1.5 less than the mean of those of the preceding five years, and 1.4 less than the mean of those of the preceding ten years. It is the lowest annual Scottish death-rate yet recorded.

Deaths of children of less than one year old numbered 12,565, and equal an infantile mortality rate of 92 per thousand registered births. This rate is 10 less than in the previous year, 15 less than the mean of those of the preceding five years, and 16 less than the mean of those of the preceding ten years. It is the lowest annual Scottish infantile mortality rate yet recorded.

The principal epidemic diseases death-rate of the year was 0.73 per thousand. It is 0.14 less than in the previous year.

The death-rate from all forms of tuberculous disease was 124 per 100,000, and from phthisis 86. Both of these rates are the lowest yet recorded. In the previous year these two rates were 129 and 88 respectively.

In the larger burghs taken collectively the birth-rate of the year was 28.6; the marriage-rate, 11.7; and the death-rate, 14.6. In the smaller burghs taken collectively these three rates were 27.7, 9.5, and 14.1; and in the county districts, 27.4, 6.4, and 13.0 respectively. Compared with the rates of the previous year, all these birth-rates and marriage-rates are higher, but all the three death-rates are lower. The increase of the birth-rate in the larger burghs is 6.6; in the smaller burghs 6.5; and in the county districts 5.8; and that of the marriage-rate in the larger burghs is 0.5; in the smaller burghs, 0.6; and in the county districts, 0.7; while the decrease of the death-rate in the larger burghs is 1.1; in the smaller burghs, 0.8; and in the county districts, 1.5.

In the larger burghs taken individually the birth-rate of the year varied from 34.8 in Hamilton, 34.2 in Greenock, 33.4 in Coatbridge, 31.3 in Motherwell, and 30.0 in Clydebank, to 22.5 in Perth, 23.2 in Edinburgh, and 25.6 in Ayr. In Glasgow it was 29.7; in Dundee, 27.4; and in Aberdeen, 29.5. In these burghs the annual death-rate varied from 16.9 in Greenock, and 15.3 in Glasgow and in Dundee, to 11.1 in Clydebank, 11.7 in Kilmarnock, and 12.8 in Paisley. In Edinburgh this rate was 13.3, and in Aberdeen, 14.6.

In the larger burghs the principal epidemic diseases death-rate of the year ranged from 1.38 in Hamilton, 1.18 in Coatbridge, 1.14 in Falkirk, and 1.11 in Greenock, to 0.55 in Edinburgh, 0.57 in Leith, and 0.59 in Perth and in Kilmarnock. In Glasgow this rate was 0.97; in Dundee, 1.05; and in Aberdeen, 0.83.

In the same burghs the phthisis death-rate of the year varied from 112 per 100,000 in Leith, 108 in Coatbridge, and 106 in Glasgow, to 67 in Motherwell, 71 in Ayr, and 75 in Coatbridge and in Kirkcaldy. In Edinburgh this rate was 85; in Dundee, 99; and in Aberdeen, 93.

TABLE IIA.—CAUSES OF DEATH IN SCOTLAND DURING YEAR 1920.

| CAUSES OF DEATH. | All Ages. | Age. | | | | | | | | | | | Age not stated. |

A general summary of the causes of death registered during the year is given in Table IIA. A comparison with the corresponding table for the previous year shows that deaths from the following causes were more numerous in this than in that year, namely enteric fever, small-pox, scarlet fever, cancer, rheumatic fever, the diarrhoeas of childhood, appendicitis, puerperal sepsis, other accidents of pregnancy and childbirth, and congenital debility, malformations and premature birth, while deaths from the following causes were less numerous, namely measles, whooping-cough, influenza, phthisis, all tuberculous disease, meningitis, heart disease, bronchitis, pneumonia, and nephritis. Deaths from small-pox registered during the year numbered 152, which is the largest number in any year since 1904, when they numbered 185; in the three years 1917, 1918, and 1919 no deaths from small-pox were registered in Scotland. Deaths from measles are fewer than in any year since 1894, while from whooping-cough they are fewer than in any previous year. Deaths from cancer are more than in all previous years; they outnumber those attributed to phthisis by 1563, or fully 37 per cent.

Table IIA. also shows the age distribution of those dying during the year. A comparison with the numbers in the previous year shows deaths in every age-group were fewer in this than in that year with one exception, those of children of less than one year being greater in this than in that year, as might be expected from the high birth-rate and consequently increased number of children exposed to the risk of death.

TABLE I.—BIRTHS, ILLEGITIMATE BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, and in the Divisions of the Counties during the Quarter ending 31st December 1920, with relative rates ; also Infantile Mortality.

STATISTICS OF QUARTER ENDING 31ST DECEMBER 1920. BIRTHS.

Births registered in Scotland during the fourth quarter of the year 1920 numbered 30,949. This number is 677 less than that of the previous quarter, and 3527 less than in the fourth quarter of the previous year, but is 4362 more than the mean of those of the fourth quarters of the preceding five years, and 2934 more than the mean of those of the fourth quarters of the preceding ten years.

The quarterly Scottish birth-rate was 25·0 per thousand. It is 0·6 less than that of the previous quarter, and 2·9 less than that of the fourth quarter of the year 1919, but is 3·3 more than the mean of those of the fourth quarters of the preceding five years, and 1·8 more than the mean of those of the preceding ten years. During the recent period of war the national birth-rate fell to 20 and even less, a minimum of 18·6 occurring in the fourth quarter of 1917, but subsequent to the armistice and the demobilisation of the troops the birth-rate rose markedly, being 27·9 in the fourth quarter of 1919, and 30·9 in the first quarter of 1920, both of which rates were in considerable excess of pre-war level, but since then this rate has been declining, and although it remains in excess of war-time level it now is down to pre-war level. The fourth quarter birth-rates of the three years 1912, 1913 and 1914 averaged 24·9, and that of the quarter now under review only differed therefrom by 0·1.

Of the 30,949 children whose births were registered during the quarter, 15,815 were males and 15,134 were females, the ratio of male to female children being 104·5 to 100. This ratio is more than in the previous quarter, when it was 103·8.

In the Divisions of the Counties the quarterly birth-rate varied from 27·3 in the South-Western, 25·3 in the North-Eastern, and 24·3 in the West-Midland, to 20·1 in the Northern, and 20·8 in the North-Western.

TABLE II.—Number of Births, Deaths, and Marriages in Scotland, and their Proportion to the Population, estimated to the middle of each year, during each Quarter of the Years 1910 to 1920 inclusive.

In the Southern Division it was 23·2; in the East-Midland, 22·9; and in the South-Eastern, 22·5.

In the counties it varied from 28·5 in Linlithgow, 28·4 in Banff, 27·7 in Ayr, and 27·5 in Lanark, to 12·0 in Bute, 16·2 in Selkirk, 16·5 in Shetland, and 18·0 in Berwick and in Peebles.

In the larger burghs taken collectively, the quarterly birth-rate was 25·2; in the smaller burghs, 24·6; and in the county districts, 25·0. In the larger burghs this rate was 0·4, in the smaller burghs 0·6, and in the county districts 0·7 less than in the previous quarter.

In the larger burghs taken individually the birth-rate varied from 33·0 in Hamilton, 30·1 in Coatbridge, 29·7 in Clydebank, and 28·3 in Greenock, to 18·6 in Perth, 19·6 in Edinburgh, 22·0 in Ayr, and 22·8 in Dundee.

In burghs with populations of between 10,000 and 30,000, it ranged from 41·6 in Port-Glasgow, 33·9 in Irvine, 32·8 in Dunfermline, and 32·5 in Wishaw, to 17·0 in Galashiels, 17·5 in Grangemouth, 18·8 in Forfar, 19·5 in Hawick, and 19·7 in Arbroath.

In county districts with populations of more than 10,000, it ranged from 34·1 in Calder District of Midlothian, 32·6 in Bathgate District of Linlithgow, and 31·9 in Ayr District of Ayr and in Middle Ward District of Lanark, to 14·6 in Highland District of Perth, 14·6 in Western District of Perth, 16·9 in Mainland District of Shetland, 17·6 in Aberdeen District of Aberdeen, and 17·7 in Central District of Perth.

Of the 30,949 children registered 28,577, or 92·3 per cent., were legitimate, while 2372, or 7·7 per cent., were illegitimate. The legitimate children of the quarter number 660 less than those of the previous quarter, and 3482 less than those of the fourth quarter of the previous year. The illegitimate children number 17 less than in the previous quarter, and 45 less than in the fourth quarter of the previous year. The illegitimate rate is 0·1 more than that of the previous quarter, and 0·7 more than that of the previous fourth quarter. In the report dealing with the statistics of the second quarter of 1920 attention was directed to the comparatively large number of illegitimate births then registered; they amounted to 2756; compared with that figure, those of this quarter are 384, or approximately 14 per cent., less.

In the Divisions of the Counties the quarterly illegitimate rate varied from 13·5 per cent. in the North-Eastern, 10·5 in the Southern, and 10·4 in the Northern, to 6·3 in the West-Midland, 6·5 in the South-Western, and 6·9 in the North-Western.

In the counties this rate ranged from 16·4 in Berwick, 15·3 in Banff, 14·8 in Elgin, and 14·3 in Caithness, to 4·5 in Nairn, 5·1 in Dumbarton, 5·3 in Renfrew, 5·7 in Orkney, and 5·9 in Linlithgow.

In the larger burghs taken collectively this rate was 7·2, in the smaller burghs, 7·2, and in the county districts, 8·7. In the previous quarter these three rates were 7·3, 6·4, and 8·6 respectively.

In the larger burghs taken individually this rate varied from 11·2 in Falkirk, 10·4 in Aberdeen, 9·9 in Perth and 8·9 in Edinburgh, to 3·8 in Clydebank, 4·1 in Motherwell, 4·4 in Kilmarnock, and 4·6 in Greenock. In burghs with populations of between 10,000 and 30,000 it varied from 13·0 in Forfar, 12·7 in Fraserburgh, and 10·7 in Montrose, to 2·5 in Buckhaven Methil and Innerleven, 3·4 in Airdrie, 3·6 in Port-Glasgow, and 3·8 in Renfrew. In county districts with populations of more than 10,000 it varied from 27·6 in Ellon District of Aberdeen, 25·4 in Garioch District of Aberdeen, 23·5 in Keith District of Banff, and 22·7 in Turriff District of Aberdeen, to 3·3 in Lower Ward District of Lanark, 3·6 in Lorn District of Argyll, 3·7 in Western District of Stirling, and 4·0 in Eastern District of Stirling.

Births registered during October numbered 10,615; during November, 9990; and during December, 10,344. The Scottish birth-rate in October was 25·5; in November, 24·8; and in December, 24·8.

The birth-rate of the quarter in England and Wales was 22·0, which is 3·0 less than the Scottish rate.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 10,504. This number is 2198 less than that of the previous quarter, and 907 less than that of the fourth quarter of the previous year, but is 1454 more than the mean of those of the fourth quarters of the preceding five years, and 1928 more than the mean of those of the fourth quarters of the preceding ten years. This is the seventh consecutive quarter in which more than 10,000 marriages were registered, while previous to the period covered by them 10,000 were never registered in Scotland in a quarter, and more than 9000 were only registered in seven quarters in all, namely in the third quarter of 1913, the second and third quarters of 1914, the second, third and fourth quarters of 1915, and the third quarter of 1918.

The quarterly marriage-rate was 8·5 per thousand. It is 1·8 less than that of the previous quarter, and 0·7 less than that of the fourth quarter of last year, but is 1·1 more than the mean of those of the fourth quarters of the preceding five years, and 1·4 more than the mean of those of the fourth quarters of the preceding ten years.

In the Divisions of the Counties the quarterly marriage-rate varied from 9·5 in the North-Eastern, 8·9 in the South-Western, and 8·8 in the South-Eastern, to 6·3 in the North-Western, and 6·4 in the West-Midland. In the counties, burghs included, it ranged from 10·5 in Aberdeen, 10·4 in Nairn, 9·9 in Midlothian, and 9·2 in Dumfries and in Lanark, to 4·9 in Sutherland, and 5·0 in Berwick, in Bute, and in Ross and Cromarty.

In the larger burghs taken collectively it was 10·2; in the smaller burghs, 8·7; and in the county districts, 5·7. In the previous quarter these three rates were 12·9, 10·0, and 6·2 respectively.

In the larger burghs taken individually this rate varied from 12·2 in Aberdeen, 11·7 in Edinburgh, 10·5 in Glasgow, and 10·4 in Perth and in Ayr, to 6·3 in Coatbridge, and 6·9 in Motherwell and in Clydebank.

In burghs with populations of between 10,000 and 30,000 the quarterly marriage-rate varied from 18·9 in Inverness, 13·4 in Fraserburgh, 13·3 in Dumfries, and 12·6 in Dunfermline, to 3·0 in Grangemouth, 3·5 in Cowdenbeath, and 5·8 in Bo'ness and in Dumbarton.

In county districts with populations of more than 10,000 it ranged from 10·3 in Annan District of Dumfries, 10·2 in Rhins District of Wigtown, and 9·2 in Cupar District of Fife, to 2·2 in Lews District of Ross and Cromarty, 2·6 in Keith District of Banff, and 3·0 in Mainland District of Shetland.

Marriages registered in October numbered 3037; in November, 3124; and in December 4343, the marriage-rate of October being 7·3; of November, 7·7; and of December, 10·4. Compared with the marriage-rate of the corresponding month of 1919, that of October is 0·4 less, that of November is 0·2 less, and that of December is 1·7 less.

DEATHS.

Deaths registered in Scotland during the quarter numbered 17,054. They are 3106 more than registered in the third quarter, and 800 more than registered in the fourth quarter of the previous year, but are 2616 less than the mean of the numbers registered in the fourth quarters of the preceding five years, and 1798 less than that of the numbers

registered in the fourth quarters of the preceding ten years. The only fourth quarters since 1867 in which in Scotland a smaller number of deaths were registered were those of the years 1919 and 1917.

The quarterly death-rate was 13·8 per thousand. It is 2·5 more than that of the previous quarter, and 0·7 more than that of the fourth quarter of the previous year, but is 2·3 less than the mean of those of the fourth quarters of the preceding five years, and 1·8 less than the mean of those of the fourth quarters of the preceding ten years. The only fourth quarter death-rates less than that of this quarter are those of 1917 and 1919.

In the Divisions of the Counties the quarterly death-rate ranged from 15·5 in the North-Western, 14·9 in the Southern, and 14·4 in the South-Western, to 12·6 in the South-Eastern, 12·7 in the West-Midland, and 13·1 in the North-Eastern.

In the counties, burghs included, this rate ranged from 16·4 in Sutherland, 16·3 in Kinross, 16·0 in Kirkcudbright, and 15·8 in Perth, to 8·6 in Nairn, 10·2 in Haddington, 10·7 in Linlithgow and 11·0 in Bute.

In the larger burghs taken collectively it was 14·4; in the smaller burghs, 14·1; and in the county districts, 12·6. In the previous quarter these three rates were 11·4, 11·7 and 10·9 respectively, while in the fourth quarter of the previous year they were 13·5, 12·9 and 12·3.

In the larger burghs taken individually the death-rate varied from 16·1 in Perth, 15·8 in Greenock, 15·2 in Motherwell, and 15·1 Glasgow, to 10·9 in Kilmarnock, 11·7 in Clydebank, 12·5 in Paisley, 13·1 in Ayr, and 13·4 in Dundee. In Edinburgh this rate was 13·7, and in Aberdeen, 14·0.

In burghs with populations of between 10,000 and 30,000 this rate varied from 20·7 in Inverness, 18·9 in Port-Glasgow, 18·4 in Montrose, and 18·1 in Kirkintilloch, to 8·3 in Cowdenbeath, 9·0 in Rutherglen, 9·2 in Buckhaven Methil and Innerleven, and 11·3 in Borrowstounness.

In county districts with populations of more than 10,000 the quarterly death-rate varied from 19·8 in Skye District of Inverness, 19·0 in Annan District of Dumfries, 18·4 in Easter Ross District of Ross and Cromarty, and 16·7 in County District of Sutherland, to 8·2 in Garioch District of Aberdeen, 8·2 in Lasswade District of Edinburgh, 8·5 in Linlithgow District of Linlithgow, and 9·1 in Ellon District of Aberdeen.

Deaths registered in October numbered 4805, in November 5643, and in December 6606. In October the monthly death-rate was 11·5, in November 14·0, and in December 15·8. In the previous year these three death-rates were 11·4, 13·3, and 14·7 respectively.

The death-rate of the quarter in England and Wales was 12·5, which is 1·3 less than the Scottish rate.

AGES OF THOSE DYING.

Of the 17,054 persons whose deaths were registered during the quarter, 4251, or 24·9 per cent., were children of less than five years old; 7179; or 42·1 per cent., were persons between the ages of five and sixty-five; and 5621, or 33·0 per cent., were aged sixty-five and upwards. In three instances the age at death was not recorded. Compared with the numbers in the previous quarter, deaths at ages under five are 1167 more; of more than five but less than sixty-five, 857 more; and of sixty-five and over, 1081 more. Compared with the number in the fourth quarter of the previous year, deaths at ages under five are 701 more; at ages five to sixty-five, 94 more; and at ages sixty-five and over, 3 more.

Deaths of children of less than one year old numbered 3261. This number is 905 in excess of that of the previous quarter, and 712 in excess of that of the fourth quarter of the previous year. The total deaths of

the quarter are 800 in excess of those of the fourth quarter of 1919, and of this the greater part, 712, is accounted for by an increase in the number of deaths of infants. The infantile mortality rate of the quarter was 105 per thousand registered births. It is 31 more than that of the previous quarter, and the same amount more than that of the fourth quarter of the previous year. This observed rise in the infantile mortality rate should not be accepted as indicative of an equivalent rise in the risk of death during childhood, for the rate as calculated depends on the number of births registered as well as on the number of deaths, and is one which is affected by a changing birth-rate, being lowered by a rising birth-rate and increased by a falling one. In the fourth quarter of the previous year the birth-rate was rising and the infantile mortality rate consequently low, but in this quarter the birth-rate was falling and the infantile mortality rate is consequently high.

In the Divisions of the Counties the infantile mortality rate of the quarter varied from 124 in the South-Western, 104 in the North-Eastern, and 93 in the East-Midland, to 50 in the Northern, 73 in the North-Western, and 80 in the South-Eastern.

In the counties it ranged from 130 in Lanark, 119 in Aberdeen, and 116 in Renfrew, to 17 in Argyll, 40 in Bute and in Selkirk, 45 in Peebles, and 46 in Shetland.

In the larger burghs taken collectively it was 122; in the smaller burghs, 95; and in the county districts, 85. In the previous quarter these three rates were 81, 73, and 65 respectively, and in the fourth quarter of the previous year they were 80, 69, and 66.

In the larger burghs taken individually this rate ranged from 146 in Perth, 143 in Aberdeen, 138 in Motherwell, and 137 in Hamilton, to 65 in Kilmarnock, 77 in Kirkcaldy, 85 in Falkirk, 88 in Edinburgh, and 91 in Ayr.

CAUSES OF DEATH.

Of the 17,054 deaths registered, 862, or 5·05 per cent. of the total, were attributed to the principal epidemic diseases. This number includes 32 from enteric fever, 36 from measles, 86 from scarlet fever, 137 from whooping-cough, 205 from diphtheria, and 366 from the diarrhoeas of childhood. Compared with the returns of the previous quarter deaths from diphtheria are 88 more, from scarlet fever 34 more, from whooping-cough 24 more, and from enteric fever 11 more, while those from measles are 25 fewer, and from the diarrhoeas of childhood 50 fewer.

The principal epidemic diseases death-rate was 0·7 per thousand. It is 0·1 more than in the previous quarter, but is the same amount less than that of the fourth quarter of the previous year. The quarterly death-rate from enteric fever was 3 per 100,000; from measles, 3; from scarlet fever, 7; from whooping-cough, 11; from diphtheria, 17; and from the diarrhoeas of childhood, 30.

In the counties, burghs included, the principal epidemic diseases death-rate varied from 1·1 in Peebles, and 0·9 in Ayr, Dumfries, Lanark, and Renfrew, to 0 in Clackmannan, Kinross, Nairn, Roxburgh, Shetland, and Sutherland. In the larger burghs it varied from 1·8 in Hamilton, 1·2 in Motherwell and in Kilmarnock, and 1·1 in Greenock, to 0·4 in Aberdeen and 0·5 in Ayr and in Perth. In burghs with populations of from 10,000 to 30,000 this rate varied from 2·8 in Port-Glasgow, 1·9 in Kirkintilloch, and 1·4 in Airdrie and in Wishaw, to 0 in Alloa and in Hawick. In county districts with populations exceeding 10,000 it varied from 1·4 in Middle Ward District of Lanark, 1·3 in Kilmarnock District of Ayr, 1·2 in Forfar District of Forfar, and 1·1 in Ayr District of Ayr, to 0 in 12 districts.

Deaths from epidemic diseases other than classed as the principal epidemic diseases included 10 from typhus fever, 6 from malaria, 30 from small-pox, 46 from erysipelas, 25 from cerebro-spinal meningitis, and 12 from encephalitis lethargica. In the previous quarter deaths from typhus fever numbered 5; from malaria, 5; from small-pox, 69; from erysipelas, 27; from cerebro-spinal meningitis, 24; and from encephalitis lethargica, 18.

Of the 30 persons dying from small-pox, 16 had been vaccinated while 14 were unvaccinated; the youngest death from small-pox among the vaccinated population was one in age group 25-34, while of the 14 unvaccinated persons dying from that disease 11 were of less than 25 years old.

Deaths from all forms of tuberculous disease numbered 1438, and constituted 8.43 per cent. of the total deaths of the quarter. They are 88 more than registered in the previous quarter, and 188 more than registered in the fourth quarter of the previous year. They equal an annual death-rate of 116 per 100,000, which rate is 7 above that of the previous quarter, and 15 above that of the fourth quarter of the previous year. These deaths included 1029 from phthisis, 121 from tuberculous meningitis, 123 from abdominal tuberculosis, and 165 others. Compared with the number in the previous quarter deaths from phthisis are 119 more, but those from abdominal tuberculosis are of the same number, while those from tuberculous meningitis are 30 fewer. Compared with the number in the fourth quarter of last year deaths from phthisis are 144 more, from abdominal tuberculosis 35 more, and from tuberculous meningitis 4 more. The quarterly death-rate from phthisis was 83 per 100,000, which is 9 above that of the previous quarter, and 11 above that of the fourth quarter of the previous year.

Deaths from malignant disease numbered 1506, and equalled a death-rate of 122 per 100,000, a rate 6 in excess of that from all forms of tuberculous disease; these deaths are 113 more than in the previous quarter, and 79 more than in the fourth quarter of the previous year.

Deaths from pneumonia numbered 1669, constituted 9.79 per cent. of the total deaths of the quarter, and equal a death-rate of 135 per 100,000. They are 819 more than in the previous quarter, and 479 more than in the fourth quarter of the previous year. Deaths from bronchitis numbered 1230, constituted 7.21 per cent. of the total deaths, and equalled a death-rate of 99 per 100,000; these deaths are 647 more than in the previous quarter, and 128 more than in the fourth quarter of the previous year.

Deaths from influenza in all numbered 159, of which 62 were attributed to influenza as a sole cause and 97 to influenza complicated by some other disease. The total number is 85 more than in the previous quarter, and 24 more than in the fourth quarter of the previous year.

Deaths attributed to violent causes numbered 747. They are 67 more than in the previous quarter, but 93 fewer than in the fourth quarter of the previous year.

Deaths ascribed to diseases and accidents of pregnancy and childbirth numbered 195. They are 42 more than in the previous quarter, but 24 fewer than in the fourth quarter of the previous year. They equal a death-rate of 6.3 per 1000 registered births, a rate which is 1.5 more than that of the previous quarter, and 0.1 less than that of the fourth quarter of the previous year.

Deaths of which the causes were ill-defined numbered 242, and those of which the cause was unstated or merely specified as "Natural Causes" numbered 83. The former included 167 attributed to heart failure and 39 to syncope. In the previous quarter deaths from ill-defined causes numbered 219, and from unstated causes 80.

TABLE III.—DEATHS FROM INFLUENZA DURING QUARTER ENDING
31ST DECEMBER 1920.

| | Total. | Males. | Females. | Age Distribution. | | | | | |
